

## FINNSUB BANG

Specification:

- 2 power settings - 30% (366 lumen) and 100% (1100 lumen)
- running time 2 hours / 10 hours
- 2 models:
  - **BANG Spot:** 5 degree beam of light, designed for the more advanced diver who dives in low visibility waters
  - **BANG Wide:** 10 degree beam of light, designed for the recreational and sport divers who dive in clean water and want intense light cover of the largest possible area
- charging through the magnetic charge contacts at the rear of the torch
- unique way of operating - light tapping onto the BANG space, 3 times to ON/OFF, 2 times to switch between the power modes
- dual software through an accelerometer analyses & identifies whether the lamp is in or out of the water
- outside of the water the software analyses vibrations to minimise the possibility of accidental activation of the light through transportation etc.
- 7000k light temperature
- overheat protection
- short circuit protection
- overcharge & discharge protection
- universal soft handle
- packed in a "washbag" style case
- weight: 250g out of the water, and only 70g underwater
- battery life: 600 full charge cycles
